

## New Forests Summer Internship 2023

**Location:** San Francisco / Flexible

New Forests ([www.newforests.com](http://www.newforests.com)) North America is pleased to announce its 2023 Summer Internship Program. We are now accepting applications for full time paid placements for this summer's program. This 10-week opportunity is scheduled to commence the first week of June and conclude the first week in August.

New Forests is a global investment manager of nature-based real assets and natural capital strategies. We manage a diversified portfolio of sustainable timber plantations and conservation areas, carbon and conservation finance projects, agriculture, timber processing and infrastructure. We aim to generate shared prosperity for our clients and the communities in which we operate and accelerate the transition to a sustainable future. Please visit our website as linked to above for more information!

Since our inception in 2005, sustainability and delivering results for our clients has been at the heart of what we do. Because sustainability is in our DNA, we attract individuals who are interested in helping our clients solve problems, and doing so with climate, community and impact in mind.

### **What can we offer?**

Our environment is busy and supportive, and the team is professional but relaxed. If you join us this summer, you would be joining a growing, fast paced business which is an environmental and sustainable leader in forestry investment. You will also be working with professionals who are passionate about their work!

### **Intern Opportunity:**

During the first week of the program there will be a thought leadership assignment that will serve as an opportunity for the interns to collaborate with each other on a global climate solution that will be presented to the company as an introduction to the firm. You will then have a unique hands-on experience in real world everyday assignments, working collectively within our network and interact both domestically and internationally with climate solution teams.

Interns will be fully immersed into our rich and diverse culture and focus on climate solution associated projects within our key verticals: Investments, Investment Analytics, Sustainability, Investor Services, and Operations. The New Forests internship will allow you the opportunity to gain valuable experience, build long lasting relationships, and develop skills within the context of an innovative global climate solutions focused business.

### **Intern Skill Qualifications:**

New Forests is seeking dynamic and energetic intern thought leaders that are excited to contribute to our next generation of global climate solutions. Interns should be familiar with sustainable real asset management in forestry, land management, sustainable finance, infrastructure, and conservation since you will be working directly within teams to create innovative solutions in response to environmental, and cultural contexts as well as execute forward thinking research.

**Please note: Internships are limited to currently enrolled students returning to school in the fall.**

### **Applying for this role:**

We pride ourselves on having a supportive New Forests culture that is inclusive to all and we would love to learn how you can bring your unique skills and experience to our business. If you have experience in any of these areas, we encourage you to apply for our roles, even if you only meet some of the criteria.

To apply, please provide your resume and cover letter, explaining your interest and qualifications for the position, in PDF format, to [careers@newforests.com.au](mailto:careers@newforests.com.au) with the email title "2023\_Summer Internship\_YourName" (ie. 2023\_Summer Internship\_altonverret).

Phone calls will not be accepted.

New Forests is a Certified B Corp and an Equal Opportunity Employer that values diversity and inclusion. We offer flexible working arrangements to all employees to support their work/life balance.
